

# Longitudinal Plan Electronic Health Information (EHI) Export for Single Patient

## Understanding Longitudinal Plan data

The Longitudinal Plan folder included in the EHI Export will contain five files representing the Longitudinal Plan data for the target patient. The data included covers the following healthcare concepts: health concerns, goals, activities, strengths, and care plans.

The links below provide documentation of the specifications for what is populated in the EHI Export files for each data concept, including the JSON structure, the attributes in the JSON, datatypes of those attributes, and what those attributes represent, along with discrete examples:

- Health Concerns: <https://docs.healtheintent.com/api/v1/health-concern#healthconcernentities>
- Goals: <https://docs.healtheintent.com/api/v1/longitudinal-plan#goals228>
- Activities: <https://docs.healtheintent.com/api/v1/longitudinal-plan#activities251>
- Strengths: <https://docs.healtheintent.com/api/v1/longitudinal-plan#strengths225>
- Care Plans: <https://docs.healtheintent.com/api/v1/longitudinal-plan#careplans>
