

<b>Capability</b>	<b>Description of Capability</b>	<b>Costs or Fees</b> <i>Types of costs or fees that a user may be required to pay to purchase, license, implement, maintain, upgrade, use, or otherwise enable and support the use of the implementation or use of the capability -OR- in connection with the data generated in the course using the capability</i>
<a href="#"><u>170.315(a)(1) Computerized provider order entry (CPOE) – medications</u></a>	This functionality enables users of CEHRT to place Medication orders, Lab Orders and Imaging orders electronically.	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately. This capability also requires a separate ePrescribing annual or monthly fee. Controlled substances require additional services from Newcrop which may have additional registration and contract required.
<a href="#"><u>170.315(a)(2) Computerized Provider Order Entry (CPOE) - Laboratory</u></a>	This functionality enables users to create and change laboratory orders for patients, as well as access information regarding the laboratory orders.	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately.
<a href="#"><u>170.315(a)(3) Computerized Provider Order Entry (CPOE) - Diagnostic Imaging</u></a>	This functionality enables users to create and change Radiology/imaging orders for patients, as well as access information regarding the Radiology/imaging orders.	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately.
<a href="#"><u>170.315(a)(4) Drug-to-Drug, Drug-to-Allergy interaction checks</u></a>	This functionality enables CEHRT users to be alerted for potential drug interaction alerts before they commit the orders to patient's chart. The Base subscription to the CEHRT provides access to Medi-Span Drug utilization review alerts during the process of ordering medications.	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately. This capability also requires a separate ePrescribing annual or monthly fee. Controlled substances require additional services from Newcrop which may have additional registration and contract required.

<a href="#"><u>170.315(a)(5) Demographics</u></a>	This functionality enables CEHRT users to capture demographic information of the patient. This capability is part of Base EHR subscription. There is integration with PM system and PM system is the source for capturing demographic data as part of patient intake process	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately.
<a href="#"><u>170.315(a)(6) Problem List</u></a>	This functionality enables a user to electronically record, change, and access a patient's active problem list over multiple encounters, following ICD-9, ICD10, and SNOMED standards.	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately.
<a href="#"><u>170.315(a)(7) Medication List</u></a>	This functionality enables a user to electronically record, change, and access a patient's active medication list as well as medication history over multiple encounters, following RxNorm, CVX, and NDC standards.	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately.
<a href="#"><u>170.315(a)(8) Medication Allergy List</u></a>	This functionality enables a user to electronically record, change, and access a patient's active medication-allergy list as well as medication-allergy history over multiple encounters, following RxNorm standards.	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately.
<a href="#"><u>170.315(a)(9) Clinical Decision Support</u></a>	Through support of content programs, users can leverage real-time, patient-specific, actionable alerts and notifications. Instant access to critical data and prospective notifications based on real-time documentation facilitate positive behavior changes at the point-of-care, improving patient outcomes.	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately.

<a href="#"><u>170.315(a)(10) Drug-formulary and Preferred Drug List Checks</u></a>	<p>This functionality enables a CEHRT user to perform Drug Formulary checks during medication prescriptions.</p> <p>This functionality is included in base CEHRT subscription and utilizes the Surescripts eligibility files to determine formulary coverage.</p>	<p>This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees.</p> <p>Training and implementation fees as well as travel expenses are billed separately.</p> <p>This capability also requires a separate ePrescribing annual or monthly fee.</p> <p>Controlled substances require additional services from Newcrop which may have additional registration and contract required.</p>
<a href="#"><u>170.315(a)(11) Smoking Status</u></a>	<p>This functionality enables a user to electronically record, change, and access the smoking status of a patient using IMO and SNOMED standards.</p>	<p>This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees.</p> <p>Training and implementation fees as well as travel expenses are billed separately.</p>
<a href="#"><u>170.315(a)(12) Family Health History</u></a>	<p>This functionality enables the user to electronically record, change and access a patient's family health history.</p>	<p>This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees.</p> <p>Training and implementation fees as well as travel expenses are billed separately.</p>
<a href="#"><u>170.315(a)(13) Patient-Specific Education Resources (Infobutton)</u></a>	<p>This functionality enables the user to electronically identify patient-specific education resources based on data included in the patient's problem list, medication list, and laboratory tests and values/results, according to Info-Button standards.</p>	<p>This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees.</p> <p>Training and implementation fees as well as travel expenses are billed separately.</p>
<a href="#"><u>170.315(a)(14) Implantable Device List</u></a>	<p>This functionality enables capture of patient implantable device data as history in the chart. The certified EHR interacts with FDA Webaccess GUDID to incorporate the device ID and Unique device Identifiers for the implantable device.</p>	<p>This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees.</p> <p>Training and implementation fees as well as travel expenses are billed separately.</p>
<a href="#"><u>170.315(a)(15) Social, Psychological, and Behavioral Data</u></a>	<p>This functionality enables capture of social, psychological and behavioral data in a question and answer format in patient chart.</p> <p>This functionality enables a user to record, change, and access social, psychological and behavioral data.</p>	<p>This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees.</p> <p>Training and implementation fees as well as travel expenses are billed separately.</p>

Care Coordination		
<a href="#"><u>170.315(b)(1) Transitions of Care</u></a>	<p>This functionality enables a user to electronically create and transmit a transition of care/referral summary in C-CDA format, which includes encounter diagnoses, immunizations, cognitive status, functional status, the reason for referral, and referring or transitioning the provider's name and office contact information. The solution follows C-CDA and Direct standards.</p>	<p>This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees.</p> <p>Training and implementation fees as well as travel expenses are billed separately.</p> <p>This capability also requires separate service from EMRDirect.</p>
<a href="#"><u>170.315(b)(2) Clinical Information Reconciliation and Incorporation</u></a>	<p>This functionality enables a user to electronically reconcile problems, medication allergies, medications, and immunizations listed in an incoming transition of care/referral summary C-CDA format to against the patient's medication list, problem list, medication-allergy list, and immunization list in the EHR.</p>	<p>This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees.</p> <p>Training and implementation fees as well as travel expenses are billed separately.</p> <p>This capability also requires separate service from EMRDirect.</p>
<a href="#"><u>170.315(b)(3) Electronic Prescribing</u></a>	<p>Complete with drug-drug interaction checks, allergy checking and plan-specific formularies, this functionality enables a user to prescribe and route prescriptions directly from the exam room to the patient's preferred pharmacy for faster fulfillment. The solution uses RxNorm and NCPD standards, and the SureScripts infrastructure for prescription transmission to the pharmacy.</p>	<p>This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees.</p> <p>Training and implementation fees as well as travel expenses are billed separately.</p> <p>This capability also requires a separate ePrescribing annual or monthly fee.</p> <p>Controlled substances require additional services from Newcrop which may have additional registration and contract required.</p>
<a href="#"><u>170.315(b)(6) Data export</u></a>	<p>This functionality enables a user to electronically create a set of export summaries for all patients in C-CDA format that represents the most current clinical information about each patient. It includes clinical data defined in the Common Clinical Data Set, the reason for referral, and the referring or transitioning provider's name and office contact information.</p>	<p>This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees.</p> <p>Training and implementation fees as well as travel expenses are billed separately.</p>

<a href="#">§170.315(b)(10) Electronic Health Information export</a>	Allow a practice to create individual and group exports of PHI without programming intervention.	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately. This capability also requires separate service from EMRDIRECT.
<b>Clinical Quality Measures</b>		
<a href="#">170.315(c)(1) Clinical Quality Measures (CQMs) – record and export</a>	This functionality enables a user to electronically capture and export all the data necessary to calculate each of the Criterions-supported Clinical Quality Measures (CQM), including the codification of CQM exceptions and exclusion.	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately.
<a href="#">170.315(c)(2) Clinical Quality Measures (CQMs) – import and calculate</a>	This functionality enables a user to electronically import all the captured data needed to calculate each of the Criterions-supported Clinical Quality Measures (CQM), and to calculate each certified CQM using the Quality Reporting Document Architecture standard.	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately.
<a href="#">170.315(c)(3) Clinical Quality Measures (CQMs) – report</a>	This functionality enables a user to electronically create a data file for transmission of Clinical Quality Measures (CQM) data according to the Quality Reporting Document Architecture standard.	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately.
<b>Privacy &amp; Security</b>		
<a href="#">170.315(d)(1) Authentication, Access Control, Authorization</a>	This functionality verifies against a username that a user seeking access to electronic health information is the one claimed and establishes the type of access to electronic health information a user is permitted based upon security	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately.
<a href="#">170.315(d)(2) Auditable Events and Tamper-Resistance</a>	This functionality logs and audits user activity while accessing the system and provides a mechanism to assure the information audited is not tampered	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately.

<a href="#"><u>170.315(d)(3) Audit Report(s)</u></a>	This functionality enables a user to create an audit report for a specific time period and to sort entries in the audit log	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately.
<a href="#"><u>170.315(d)(4) Amendments</u></a>	Permits a patient to submit an amendment to their electronic health record	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately.
<a href="#"><u>170.315(d)(5) Automatic Access Time-Out</u></a>	This functionality automatically stops user access to health information after a predetermined period of inactivity	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately.
<a href="#"><u>170.315(d)(6) Emergency Access</u></a>	This functionality permit an identified set of users to access electronic health information during an emergency.	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately.
<a href="#"><u>170.315(d)(7) End-User Device Encryption</u></a>	EHR Technology is designed not to locally store electronic health information on end-user devices	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately.
<a href="#"><u>170.315(d)(8) Integrity</u></a>	This functionality allows the system to create a message digest using a hashing algorithm with a security strength equal to or greater than SHA-2. to ensure that the content has not been altered.	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately.
<a href="#"><u>170.315(d)(9) Trusted Connection</u></a>	Encrypt and integrity protect message contents in accordance with the standards. A hashing algorithm with a security strength equal to or greater than SHA-2 is used	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately.
<a href="#"><u>§170.315(d)(12) Encrypt authentication credentials</u></a>	The Criterions EHR stores authentication credentials in accordance with standards adopted in § 170.210(a)(2).	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately.

<a href="#"><u>§170.315(d)(13) Multi-factor authentication</u></a>	The Criterions EHR supports multifactor authentication through email and/or texting to verify users and patients.  Use of texting for MFA requires texting activation and cost per text billed monthly.	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately. Use of texting for MFA requires texting activation and cost per text billed monthly.
<b>Patient Engagement -</b>		
<a href="#"><u>170.315(e)(1) View, Download, and Transmit</u></a>	<p>This functionality enables patients to view, download or transmit their health information in the Criterions' patient portal that was sent from the Criterions EHR. The data encompasses the common clinical data set and potentially may include other data, including notes and documents.</p> <p>Any time there are patient chart changes, the EHR automatically sends an update of the chart in CCDA format to the Criterions Patient portal for the patient to view.</p>	<p>This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately.</p> <p>This functionality requires a client's patients to use the client's patient portal, which allows for secured transmission of patient health information from the EHR so the patients can view their health information.</p> <p>The Patient Portal is included as a part of the client's EHR.</p>
<a href="#"><u>170.315(e)(2) Secure Messaging</u></a>	<p>This functionality enables users to send and receive secure messages to/from patients in the EHR using the Criterions patient portal. Secure messages may be initiated by the provider using the EHR or the patient using the patient portal, and may include clinical data, administrative data, and other information.</p> <p>This requires an integration interface with the EHR and allows for the secure message to be exchanged with the provider in their own EHR workflows.</p>	<p>This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately.</p> <p>This functionality requires a client's patients to use the client's patient portal, which allows for secured transmission of patient health information from the EHR so the patients can view their health information.</p> <p>The Patient Portal is included as a part of the client's EHR.</p>
<a href="#"><u>170.315(e)(3) Patient Health Information Capture</u></a>	This functionality enables user to capture patient health information into chart to support better patient engagement in their care. Criterions Patient portal can be utilized to provide this data in addition to EHR functions.	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately.
<b>Public Health</b>		

<a href="#"><u>170.315(f)(1) Transmission to Immunization Registries</u></a>	This functionality electronically transmits the recorded or changed immunization information to a state registry using HL7 Immunization Messaging standard.	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately. An HL7 Immunization interface is required for transmission between Criterions and the external registry. Implementation fees are not included in the EHR maintenance. Each registry integration will have different costs, one-time fees as well as monthly maintenance. Criterions will only setup Immunization with registries that follow the standards for which Criterions was tested during the ONC 2015 certification. Any additional changes or customization required by the registries is billed to the client.
<b>Design &amp; Performance</b>		
<a href="#"><u>170.315(g)(2) Automated Measure Calculation</u></a>	This functionality enables certifying EHR to record and calculate objective measures.	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately.
<a href="#"><u>170.315(g)(3) Safety-Enhanced Design</u></a>	This functionality enables certifying EHR to meet the summative usability guidelines for end users.	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately.
<a href="#"><u>170.315(g)(4) Quality Management System</u></a>	This functionality enables use of certified EHR technology for users with disabilities. Professional EHR adhered to WCAG 2.0 standards.	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately.
<a href="#"><u>170.315(g)(6) Consolidated CDA Creation Performance</u></a>	This functionality certifies the CDA performance for all CDA documents generated from certified EHR to ONC prescribed standards.	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately.
<a href="#"><u>170.315(g)(7) Application Access – Patient Selection</u></a>	This functionality enables patient to connect with any 3rd party patient engagement App using FHIR APIs with their practice EHR.	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately. This capability also requires separate service from EMRDirect.

<a href="#"><u>170.315(g)(8) Application Access – Data Category Request</u></a>	This functionality enables patient to connect with any 3rd party patient engagement App using FHIR APIs with their practice EHR and request data from Common Clinical Data set categories	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately. This capability also requires separate service from EMRDirect.
<a href="#"><u>170.315(g)(9) Application Access – All Data Request</u></a>	This functionality enables patient to connect with any 3rd party patient engagement App using FHIR APIs with their practice EHR and request their CCD data	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately. This capability also requires separate service from EMRDirect.
<a href="#"><u>§ 170.315(g)(10) – Standardized API for patient and population services</u></a>	The creation of a FHIR endpoint which will allow patients to access their PHI through an API of the patient's choosing.	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately. This capability also requires separate service from EMRDirect.
<b>Transport Methods and Other Protocols</b>		
<a href="#"><u>170.315(h)(1) Direct Project</u></a>	This functionality allows certified EHR to connect with any HIE and demonstrate interoperability using DIRECT protocols.	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees. Training and implementation fees as well as travel expenses are billed separately. This capability also requires separate service from EMRDirect.
<a href="#"><u>170.315(d)(11) Accounting of Disclosures</u></a>	This functionality allows recording of disclosures made for treatment, payment, and health care operations in accordance with the standard specified in §170.210(d).	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees.
<a href="#"><u>170.315(g)(5) Accessibility-centered design</u></a>	This functionality allows identifies a single accessibility-centered design standard or law used in the development, testing, implementation, and maintenance of capabilities for which certification is being sought.	This capability requires the Criterions EHR product which may be sold to customers with either a one-time License fee plus an annual, quarterly or monthly fee per provider or user, or as an annual, quarterly or monthly SaaS subscription fees based on the number of providers and users with some one-time set-up fees.
