## Electronic Health Information (EHI) Export Overview

InteliChart's certified health IT modules can store Electronic Health Information (EHI). Our product can support export EHI request in an electronic and computable format. InteliChart's EHI export capabilities permit the extraction of the Electronic Health Records (EHR) in the form of an export zip file in a machine-readable format in accordance with §170.315(b)(10) – Electronic Health Information export of the ONC 2015 Edition Cures Update Certification Criteria.

Our process is inclusive of Single Patient Export capability that is intended to fulfill a patient's right of access request their medical data.

The Patient Population Export process intended for the purpose of facilitating data transitions when providers switch health IT systems.

This revised criterion will enable a clinician, or their staff, to export all EHI stored in the Certified Health IT product for a single patient or the EHI for the clinician's entire patient population. The criteria and process fully support individual patients' right to access to their electronic data while empowering providers and their organizations to migrate all the EHI from one Certified Health IT product to any health IT system of their choosing.

The content and format of the data contained within the export zip file is contingent upon additional factors which may include the following:

- Product Version
- Relied upon external software
- Configurations of the healthcare organization
- Healthcare organization's chosen usage of the system

Output content may vary based on the healthcare organization's software and platform.

The information below provides an overview of the data format specifications for InteliChart EHI Export capabilities that supports our health IT module. It is our expectation that these specifications should be assist the requestor to simplify and process EHI data. Please note that the specifications provided

| EHI Export Type | Data Overview and Instructions | Data Format Specifications |
|---|---|---|
| **Single Patient Export** | Single Patient EHI Export Data Overview and User Instructions (PDF) | Single Patient EHI Export Data Format Specifications (ZIP) |
| **Patient Population Export** | Patient Population EHI Export Data Overview and User Instructions (PDF) | Patient Population EHI Export Data Format Specifications (ZIP) |

| | |
|---|---|
| **Single Patient EHI Export Data may include where applicable** | Electronic chart documents<br>US Core FHIR data<br>CCDA documents<br>Clinical, Administrative and Financial reports |
| **Patient Population EHI Export Data may include where applicable** | Patient data files as comma-separated values (CSV)<br>US Core FHIR data<br>CCDA documents<br>Clinical, Administrative and Financial reports/images |

FHIR Bulk Data Access is backed on HL7 Standard Release 4.0.1 contains all available FHIR resources for the exported patient CCD/C-CDA Documents
