170.315(b) (10) Electronic Health Information (EHI) Export

Product – MDinteractive

Product Version – 6.0

Document Version – 1.0

Last updated: November 15, 2022

Summary

The document enables you to export the patient's EHI data in an Excel format. You can export the EHI data either for a single patient or for all the patients.

The Excel file has multiple fields grouped in the following sections:

Provider information:

- Provider Last Name
- Provider First Name
- Individual NPI
- TIN

Patient demographics:

- Last Name
- First Name
- MI (Middle initial)
- DOB (Date of birth)
- Gender
- MRN (Medical record number)

Quality action fields:

- Visit, procedure or surgery date - based on MIPS CQM specifications. The CQM specifications can be obtained here: https://mdinteractive.com/2022-mips-quality-measures
- Numerator action - based on MIPS CQM specifications. The CQM specifications can be obtained here: https://mdinteractive.com/2022-mips-quality-measures
- Denominator - based on MIPS CQM specifications. The CQM specifications can be obtained here: https://mdinteractive.com/2022-mips-quality-measures
